## ⚠ **WARNING**

For your own safety and the safety of the people around you, be sure to read the procedures noted within carefully before performing maintenance on this product. After reading this document, be sure to keep it handy for future reference.

## ⚠ **WARNING**

Before commencing any maintenance work, Disconnect the compressed air supply and remove and clean any remaining liquids contained on around or within the pump. If liquids are not removed or neutralized then there is a possibility of a serious injury such as burns, blindness, poisoning or even death if chemicals adhere to the skin eyes or are accidentally inhaled or swallowed. If residual air pressure is present within the pump there could be a danger of sudden decompression or explosion resulting in severe injury or even death. In case of disassembling, be sure to wear protective equipment, such as face mask, gloves, etc. When replacing spare parts, be sure to use genuine YTS parts. The installation and use of non-specified parts may cause a malfunction or damage to the product.

### Service Tools

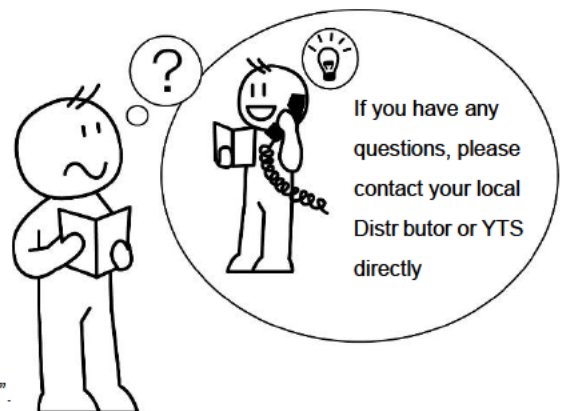

Ⓐ Sleeve Puller Tool (Can be purchased separately)

### Recommended Changeover Time for the Replacement of Diaphragms ※

CR, NBR, EPDM	10 million cycles
FKM	2.5 million cycles
PTFE	3 million cycles
TPEE, TPO	15 million cycles

- ※ Conditions; with fresh water at room temperature and 0 head  
Conditions such as over pressurization, dry running high or low temperatures, Chemical attack or Abrasion etc. can drastically shorten diaphragm life.
- ※ O-rings and packing should be replaced during service.
- ※ When reassembling the pump please follow the disassembly Procedure in reverse. For all torque values refer to the Exploded view on page 4.
- ※ When ordering spare parts, please refer to the pump "SERVICE CODE". As stated on the Identification plate.
